

## ATLA FNCL + FNIL

In 1993, the two federations of French dairy manufacturers, **FNCL** (the National Federation of Dairy Cooperatives) and **FNIL** (the National Federation of Private Dairy Processors) created **ATLA**, the French Association of Dairy Processors. Noting the convergence of their basic interests, these federations decided to merge their skills, as well as much of their resources.

**ATLA** addresses most of the “upstream” issues concerning the industrial transformation and marketing of dairy products.

## MISSIONS AND FIELDS OF ACTIVITY

### In France

**Defending** the common interests of **FNCL** and **FNIL** members in the following fields:

- economic
- technical and regulatory
- legal, fiscal and employment-related

### Abroad

**Representing** the same companies vis-à-vis European and international authorities. **ATLA** represents the French delegation of the European Dairy Association (EDA).

## GOVERNING BODIES

**ATLA** is a non-profit association as defined by French 1901 law, with two members, **FNCL** and **FNIL**. Its General Assembly is composed of the Governing Boards of these two federations.
